

# Creating a Signature Brush

- 1) grab a piece of plain white paper
- 2) sign your name
- 3) photograph or scan the piece of paper (signature)
- 4) download the file
- 5) open the file in Photoshop
- 6) crop to signature

- 7) clean up dust dirt etc.
- 8) add a threshold adjustment layer to clean up signature and add contrast
  - if you don't like the look, clean up the file using traditional clone or healing then use a curve or levels to pop contrast
- 9) make a selection of your signature using the marquee tool
- 9) menu: edit - define brush preset
  - your selection is limited to 2500 pixels

-grab the brush tool, go to brushes  
your new brush will be at the bottom of the brush list.

stamp your signature...

remember you can change the size of your signature by sliding the master diameter slider in the brushes palette.
