

## Scott Kelby Junky Edge Template

- 1) Open an image
- 2) Image - Adjustments - Threshold  
Move slider for desired look
- 3) Select area for edge effect
- 4) Command - Copy  
move to new image to add new border  
create a new layer (what happens if you do not add a new layer?)
- 5) Command - Paste
- 6) Change Layer Blend Mode to (Multiply) to loose the White  
EDGE 1  
Flip: horizontal/vertical  
Rotate: CW/CCW  
Command (T) to transform (scale, rotate, flip, ect)

- 7) Repeat steps until you have the border you are looking for.
- 8) Merge the edge layers together, you have a new border
- 9) SAVE
