

## ***Imaging Dreams***

In search of nature, serenity and peace. I capture the beauty of our environment, the mountains, the water, the landscape in hopes of sharing what I experience with others.

In a fraction of a second, maybe even longer my shutter clicks preserving this beauty around us. My work is shot and produced digitally using Canon bodies and lenses.

I hope to pull you into my experience. The frame (2:3), is what I think of as the winding hilly roads of adventure defining the photographic moments of perfection: light, line, movement, shape, and metaphor.

Recently the light, line, movement, shape and metaphor I find so exciting in the landscape have been revealing themselves in my new explorations of people and architecture in city's large and small.

Explore my images, Explore your land.
