

**Objective:**

- To understand the beginning stages of professionally sharing images with clients, galleries and future prospects.
- To problem solve and find the best way to make a Presentation Using Adobe Spark.

**We will create an Adobe Spark Presentation (Web Page):**

- Choose images that hold together as a series or idea.
- Use 15-20 images Select only your strongest images - in focus - properly exposed - edited using Photoshop.
- Put the selected images in a folder to work from.
- When creating the Presentation add text, walk me through your images. What you did. What you were thinking. What you did with processing, anything you want to share.
- Include your name in the Presentation.
- Include a title for the project at the start of the Presentation.
- Include your email at the end of the Presentation.
- Include your Instagram or other social media options you use where people could follow you at the end of the Presentation.
- Have fun

Submit the Adobe Spark URL through Canvas.

<https://spark.adobe.com/sp/>

**Recommendations:**

- Size your files - 2048 - 3000 pixels longest side 72ppi and saved as a .jpg for Presentation best results.
- Your computer monitor is horizontal. I recommend your start and end slide be horizontal.

**Below are 4 links to Spark Pages done in my Las Vegas Document class:**

These will give you an idea of what is possible.

These are all stories about a time in history.

Think about these and also think how they could inspire your final projects.
